

Why to Choose our Post-Mortem equipment?

Because the **safety of the user is our biggest concern**. We want all professionals to be healthy and happy in their workplace and **our planet to be the safest place** for generations to come.

Because we work hard to **ease the work and ergonomics of the user, reduce work health issues** and avoid the transfer of bodies. We achieve this through the development of **devices and tools absolutely compatible** with our mortuary chamber.

Because, in order to provide **proper service** in the whole world, we only use **premium materials** and work with the **best suppliers and partners**.

These are the reasons that motivate our commitment to research and continuous development of innovative equipment. These are some specific improvements that you can find in our Post-Mortem equipment:

- Ozone disinfection system
- Intelligent ozonizer for water
- Wastewater disinfection system
- Air disinfection systems inside chambers
- Downdraft airflow system with UVC disinfection light

More than 30 years of experience in the industry have given us the expertise and knowledge to provide **customised high-quality solutions** to all our customers.

We are **committed to continuous improvement** and the implementation of new practises and manufacturing processes to achieve excellence.

Our passion is to innovate, design and manufacture all the products that **you may exactly need** and with the highest quality: this makes our difference.

We are an Engineering firm, specialized in **solving the specific needs of each project**: a team that our distributors can trust.

POST-MORTEM SPECIALISTS

AnatHomic Solutions AUTOPSY APPLIANCES

A complete series of equipment specially developed to meet the most demanding needs in terms of occupational health, guaranteeing perfect protection for pathologists and technical users :

- Autopsy tables
- Autopsy station
- Air filtration system
- Washing station
- Dissection tables
- Preparation tables
- Transport platform for bodies
- Bone and evidence dryer
- Autopsy saw, instruments and other accessories
- Mobile macro photography system

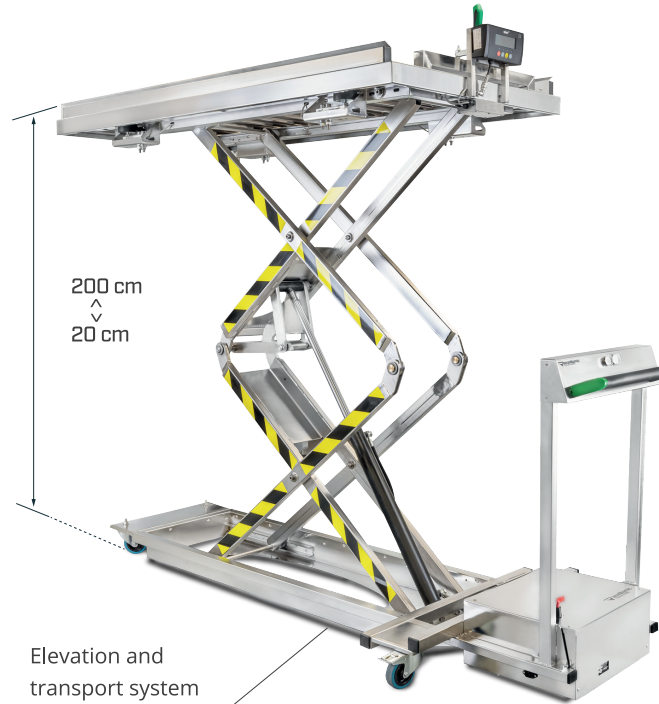

ME-101 ASP
Autopsy table with elevation
and aspiration system

SMA-2
Mobile macro
photography system

*Original Design, the only one that solves accessibility
problems to the chambers of lower height.*

Elevation and
transport system
CA-403-SF-200

AnatHomic Solutions LIFTING & TRANSPORT

Our lifting and transport systems, adapted to each space and available in different models, comply with the most demanding regulations regarding occupational health and environmental safety :

- Elevation & transport systems with automatic transfer
- Elevation & transport systems with scale
- Concealment elevation and transport systems
- Elevation, transport and exhibition trolleys
- Multi-purpose elevation and transport systems

AnatHomic Solutions REFRIGERATION SYSTEMS

We offer a wide range of equipment to cover all the needs of the area, either standardised or customised, with the possibility to fit each space and way of working. Our chambers and cold rooms have the option of refrigeration systems that use non-polluting gases, which are undoubtedly the future of refrigeration in a sustainable planet:

- Refrigerated chambers and rooms
- Mobile structures
- Customised internal structures according to all kind of trays
- Customised accesses
- Customised refrigeration equipment placement
- Special applications and sizes
- Compatible trolleys that perfectly fit our chambers

We can offer many optional elements and configurations so that the user has a customised solution that facilitates their work and ensures optimal preservation and traceability
