## AUTOPSY TABLE WITH DISINFECTION SYSTEM

### MESA DE AUTOPSIAS CON SISTEMA DE DESINFECCIÓN INTEGRADO

### TABLE D'AUTOPSIE AVEC SYSTÈME DE DÉSINFECTION

Designed fulfilling the current regulations regarding safety at work.  
*Diseñada cumpliendo la normativa vigente relativa a la seguridad en el trabajo.*  
*Conçue dans le respect des réglementations en vigueur en matière de sécurité au travail.*

Its main characteristic, which makes it different from other autopsy tables, is the incorporation of a specific Internal Treatment System for liquids, through the injection of sodium hypochlorite (NaClO). The wastewater generated in forensic tasks is disinfected before being evacuated to the general sanitation network. All this process is carried out in a controlled and automated way through a control panel external to the table, so that the operation is simple and intuitive for the end user.

*Su característica principal, que la diferencia de otras mesas de autopsia es la incorporación de un Sistema Interno de Tratamiento específico para líquidos, mediante la inyección de hipoclorito sódico (NaClO). Las aguas residuales generadas en las tareas forenses se desinfectan antes de ser evacuadas a la red general de saneamiento. Todo este proceso se realiza de forma controlada y automatizada a través de un cuadro de control externo a la mesa, de manera que el funcionamiento resulta sencillo e intuitivo para el usuario final.*

*La principale caractéristique, qui la différencie des autres tables d'autopsie, est l'incorporation d'un système de traitement interne spécifique pour les liquides, par injection d'hypochlorite de sodium (NaClO). Les eaux usées générées lors des tâches médico-légales sont désinfectées avant d'être évacuées vers le réseau d'assainissement général. Toute cette opération est réalisée de manière contrôlée et automatisée via un panneau de contrôle externe à la table, de sorte que l'opération est simple et intuitive pour l'utilisateur final.*

**ASP** MESA DE AUTOPSIAS CON ELEVACIÓN Y SISTEMA DE ASPIRACIÓN  
TABLE D'AUTOPSIE À HAUTEUR RÉGLABLE AVEC SYSTÈME D'ASPIRATION

With lifting mechanism, by means of an electromechanical system, which allows an interrelation between the height of the table and the height of the user. An aspiration system is integrated, descending, allowing the absorption of odors or other gases, and ensuring safe work avoiding possible inhalations by air for the user.

*Con mecanismo de elevación, por medio de un sistema electromecánico, que permite una interrelación entre la altura de la mesa y la altura del usuario. Integrado un sistema de aspiración, descendente, posibilitando la absorción de olores u otros gases y asegurar un trabajo seguro evitando posibles inhalaciones por vía aérea para el usuario.*

*Munie d'un système d'élévation électromécanique, qui permet d'adapter la hauteur de la table à la hauteur de l'utilisateur. Un système d'aspiration descendant est intégré, permettant l'absorption d'odeurs ou autres gaz et assurant un travail sûr en évitant à l'utilisateur d'éventuelle inhalations par voie aérienne pour l'utilisateur.*

# 07 WASTEWATER DISINFECTION SYSTEM SISTEMA DE DESINFECCIÓN DE AGUAS RESIDUALES SDA-C SYSTÈME DE DÉSINFECTION DES EAUX USÉES

We consider wastewater management as an important part of safety, both for the professional and for the environment.

Our wastewater disinfection system, SDA-C, performs a specific treatment to fluids, by injecting sodium hypochlorite (NaClO).

All this process is carried out in a controlled and automated way through a control panel, so that the operation is simple and intuitive. At all times, the system provides information through the screen and in some cases, it will also make use of acoustic alarms and thus alert the end user.

*Consideramos la gestión de las aguas residuales como una parte importante de la seguridad, tanto para el profesional como para el medio ambiente.*

*Nuestro sistema de desinfección de aguas residuales, SDA-C, realiza un tratamiento específico a los fluidos, mediante la inyección de hipoclorito sódico (NaClO).*

*Todo este proceso se realiza de forma controlada y automatizada a través de un cuadro de control. En todo momento, el sistema proporciona información a través de la pantalla y en algunos casos, también hará uso de alarmas sonoras y poner así en aviso al usuario final.*

*Nous considérons la gestion des eaux usées comme un élément important de la sécurité, tant pour le professionnel que pour l'environnement.*

*Notre système de désinfection des eaux usées, SDA-C, effectue un traitement spécifique des fluides, par injection d'hypochlorite de sodium (NaClO).*

*L'intégralité ce procédé est effectué de manière contrôlée et automatisée via un panneau de contrôle, de sorte que l'opération est simple et intuitive. À tout moment, le système fournit des informations à travers l'écran et dans certains cas, il utilisera également des alarmes sonores et alertera ainsi l'utilisateur final.*

### GROSSING STATION ESTACIONES DE TALLADO STATION DE MACROSCOPIE

Designed for the Pathological Anatomy area, our Grossing Station for cutting and carving samples, through their different models, will provide you comfort, ergonomics, and safety in the development of laboratory tasks.

In the manufacture of the grossing stations, has been paid special attention to the user. The workstation has been conceived so that laboratory tasks are carried out in the most comfortable and safe way, meeting the highest levels of demand in terms of work safety.

*Diseñado para el área de la Anatomía Patológica, nuestras Estaciones de Trabajo para el corte y tallado de muestras, a través de sus diferentes modelos, le proporcionarán confort, ergonomía y seguridad en el desarrollo de las tareas de laboratorio.*

*En la fabricación de las estaciones de tallado se ha prestado especial atención al usuario. El puesto de trabajo ha sido concebido para que las tareas de laboratorio se ejecuten de la manera más cómoda y segura, cumpliendo los más altos niveles de exigencia en cuanto a seguridad laboral.*

*Conçues pour le domaine de l'anatomie pathologique, nos postes de travail de découpe et de sculpture d'échantillons, à travers leurs différents modèles, vous apporteront confort, ergonomie et sécurité dans le développement des tâches de laboratoire.*

*Pour le développement des stations de macroscopie, une attention particulière a été portée à l'utilisateur. Le poste de travail a été conçu pour que les tâches en laboratoire soient effectuées de la manière la plus confortable et la plus sûre, tout en répondant aux plus hauts niveaux de demande en termes de sécurité du travail.*

# ANTIBACTERIAL AND DECONTAMINATING STICKY MATS

## ESSENTIAL WHERE MAXIMUM HYGIENE AND DECONTAMINATION ARE REQUIRED

Antibacterial mats with Biomaster have been tested by independent laboratories according to the ISO 22196:2011 standard to demonstrate effective antimicrobial efficacy:

- **Acinetobacter baumannii by > 99,999 %**
- **Pseudomonas aeruginosa by > 99,999 %**
- **Listeria monocytogenes by > 99,999 %**
- **Klebsiella pneumoniae by > 99,999 %**
- **Enterococcus faecium by > 99,992 %**
- **MRSA by > 99,84 %**
- **Escherichia coli by > 99,99 %**
- **SARS-CoV-2\_COV2019 tested**
- **MDR 2017/745**

The University of Ferrara, in particular the chair of Cytology and Histology, has published an experimental analysis on the use of decontaminating carpets in hospitals. The study shows that the use of CBS Medical antibacterial mats results in a significant reduction of the microbial load caused by the passage of staff and also of the beds mounted on wheels in the floor area beyond the mat itself. biocidal capacities.

The use of decontaminating and antibacterial mats with Biomaster significantly reduces the presence of microorganisms.

Therefore they are considered as necessary devices especially in the access areas at risk, such as operating theatres, departments with immunosuppressed patients, food and pharmaceutical sectors/industry.

The presence of microorganisms during the passage of carts or people it is usually underestimated. The greatest danger is to

contaminate these risk areas: by walking or passing with trolleys, the resistant microorganisms are lifted, becoming a source of infection.

To reduce this type of contamination, our research and development department has developed decontaminating and antibacterial mats. Antibacterial mats are medical device of class 1 (CE); not only a dust catcher but a device with certified biocidal capacities.

Mats composed by 30 or more layers with adhesive bottom. Packs of 4 or 8 mats.

# ANTIBACTERIAL MATS WITH BIOMASTER

## MADE WITH SECOND LIFE FILM

### TESTED

**ISO 22196:2011** (MRSA, E. coli, Acinetobacter baumannii, Pseudomonas aeruginosa, Listeria, Klebsiella pneumoniae, Enterococcus faecium)

**ISO 21702:2019 SARS-CoV-2**

Manufactured using second life film: Granules and coils obtained by extrusion using subproducts in the minimum amount of 50%

Composition	<b>Self-adhesive mat comprising</b> of 30 numbered tear off sheets, made of low density polyethylene, having a high bond strength and protected with an antimicrobial, designed to inhibit the growth of bacteria on the surface. Active substance: BIOMASTER*
Packaging	Carton box including 4 or 8 mats.
Colour	Blue
Measures	all those in the catalogue
Characteristics	<ul style="list-style-type: none"><li>• The sheets are protected with antimicrobial technology which is incorporated in the glue.</li><li>• The mat consists of numbered tear sheets from 30 to 1. Also available with 10/20/30/40/60 sheets.</li><li>• Thanks to special water-based glue (8gr/mq+/- 1 gr), CBS Medical mat can be placed anywhere without leaving any residue, allowing practicality and ease use of the mat.</li></ul>
Generalities	<ul style="list-style-type: none"><li>• Good high temperature strength, good UV and ageing resistance. Temperature: Optimum: min. 15° max. 30° Of use: min. -20° max. 70° Borderline: min. - 25° max. 90°</li><li>• Electrostatic charge: on the floor with a new mat: form -80 to -120 V/inch</li></ul>
Material:	Polyethylene
Duration	3 years if correctly conserved.
Areas of application:	Hospitals: risk departments, infectious departments, operating rooms, risk environments, clean rooms. Industries: pharmaceutical, food, electronics, laboratories, food processing, packaging, food processing. Wherever it is indispensable to inhibit the development of bacteria.
Disposal:	In accordance with National Laws and rules regarding the disposal of plastics.

*\*Biomaster is an antimicrobial technology effective against a wide spectrum of microorganisms (bacteria and molds) and as such used in a wide range of applications. Please refer to [www.addmaster.co.uk](http://www.addmaster.co.uk) for more information. All products containing Biomaster are tested by independent laboratories according to the ISO 22196:2011 standard to demonstrate effective antimicrobial efficacy.*

**PSV By-Product** label: Certifies plastic materials managed as by-products (i.e., residues, scraps and pre-consumer plastic industrial residues coming from both the production and the transformation of polymers, actually used during the same or a subsequent plastic material manufacturing process by the manufacturer or by third parties, without further treatments other than standard industrial practices, since they already meet product requirements in the sector for further activities of production/transformation of plastic materials) and/or materials and/or semi-finished products and/or finished products made from by-products.

# PERMANENT WASHABLE DECONTAMINATING ANTIBACTERIAL MATS

## PERMANENT WASHABLE TACK MAT, MADE OF ANTIBACTERIAL PVC.

- Made of PVC
- Suitable in all types of floor
- Anti-slip
- Impermeable surface
- Long lasting
- It prevents the growth of organisms
- Easy to clean
- Dimensions on request
- Colour: blue, grey, green and red
- It reduces the electrostatic charges

### MAINTENANCE:

The cleaning of the mat is a very quick and easy process: with our Deter Med - specific for washable mats, or with a generic detergent, mop and squeegee.

### PRODUCT LIFE EXPECTANCY:

Three years according to model.

### USE:

Suitable for pedestrian and forklift passage - according to model

### APPLICATIONS

#### Hospital Sector:

Public Hospital, Private Care Home, Private Medical Outpatient Clinic, Dentist, Pharmacy, etc.

#### Industrial Sector:

Pharmaceutical Industry, Food Industry, Cosmetic Industry, Electronics Laboratory, Clinical Analysis Laboratory, Sports Centre, Research Centre, etc.

### COMPLEMENTARY PRODUCTS:

- Application of perimeter borders (welded to the mat)
- Application of repositionable acrylic glue with antistatic additive on the lower side and protective liner (antibacterial glue with Biomaster).

# PERMANENT WASHABLE ANTIBACTERIAL MATS

SUITABLE FOR FORKLIFTS AND PEDESTRIAN TRAFFIC

## TECHNICAL DATA

### PRODUCT CODE: 573680

Thickness	3,1 ± 0,1 mm
Weight	3,20 kg/m <sup>2</sup> (±10%)
Hardness	65 Shore A - Din 53505
Working Temperature (Long Term)	-15 / +80 °C
Working Temperature (Short Term)	-15 / +100 °C
Load Resistance	105 kg/cm <sup>2</sup>
Colour	Blue
Dimensions	on request (max. height: 2 m; max. length: 20 m)
Antimicrobial Protection	ISO 22196: 2011
High Conductive	Iso 284& 21178
Food Approved	Fda 21 cfr & Eu 10/2011
Flame Retardant	Iso 430

*Non-toxic ingredients due to the FDA standard. In accordance with the regulations on biocides, BPR-registered biocide. Non-phthalates ingredients.*

# PERMANENT WASHABLE ANTIBACTERIAL MATS

SUITABLE FOR PEDESTRIAN AND TROLLEY TRAFFIC

## TECHNICAL DATA

### PRODUCT CODE: 603080

Thickness	3,0 ± 0,1 mm
Weight	3,0 kg/m <sup>2</sup> (±10%)
Hardness	35 Shore A - Din 53505
Working Temperature (Long Term)	-15 / +80 °C
Working Temperature (Short Term)	-15 / +100 °C
Load Resistance	55 kg/cm <sup>2</sup>
Colour	Blue

## ANTISTATIC ADDITIVE

Mixture of amide esters and polymeric esters. Antistatic additive to ensure a long-term effect of antistaticity on PVC products. It is an antistatic plasticiser for synthetic polymers.

Surface conductivity EN 1081 - Value below 1000 Mohm, material antistatic. **MOhm Min. 250 Max. 450**

Passing conductivity UNI EN 1081 - Value below 1000 Mohm, material antistatic. **MOhm Min. 45 Max. 90**

# PARTICLE REMOVAL EFFICIENCY OF A PERMANENT WASHABLE MAT

## DECONTAMINATING ANTIBACTERIAL MAT

### PURPOSE OF THE STUDY:

Determine the particle removal efficiency of a permanent washable antibacterial mat by tape sampling technique and particle and fiber counting under an optical microscope (technical control of cleanliness).

### AIM OF THE STUDY:

Evaluate the effectiveness of bacterial (E. coli) removal of the Hello Mat.

*Request the file of the entire study.*

## ANTIBACTERIAL PROPERTIES WASHABLE MAT

The antibacterial properties of the surfaces are designed to prevent the growth of organisms. So, the organisms cannot be transferred during the transition.

Tests have demonstrated that the active substances are effective to neutralize rapidly many common organisms. Unlike other non-antimicrobial products, our mats provides a 100% protection due to their effective formula. The antibacterial properties are in accordance with ISO 22196: 2011.

- Effective antibacterial technology which protects against dangerous bacteria as Staphylococcus Aureus, E.coli and Listeria.
- The film had been soaked in the antibacterial fluid in order to provide the maximum protection.
- Non-toxic ingredients due to the FDA standard.
- In accordance with the regulations on biocides.
- Non-phthalates ingredients.

### TEST REPORT N°: 24LA12692 OF 02/08/2024

Determination of antibacterial activity (R) - $R=(U_t-U_o)-(A_t-U_o)$	> 5.1
Determination of antibacterial activity (R) ISO 22196:2011	> 99.999%
Gram-positive strain	Listeria monocytogenes ATCC 13932

### TEST REPORT N°: 24LA12693 OF 02/08/2024

Determination of antibacterial activity (R) - $R=(U_t-U_o)-(A_t-U_o)$	> 4.2
Determination of antibacterial activity (R) ISO 22196:2011	> 99.994
Gram-positive strain	Staphylococcus aureus subsp. aureus Methicillin resistant ATCC 33591

### TEST REPORT N°: 23LA09576 OF 18/05/2023

Determination of antibacterial activity (R) - $R=(U_t-U_o)-(A_t-U_o)$	> 5.0
Determination of antibacterial activity (R) ISO 22196:2011	> 99.999
Type of Gram-negative strain	Escherichia coli ATCC 8739

# ROLL EDGES

## MADE OF PVC

### TECHNICAL DATA

**Code: 01BLK** - black border H 7 cm roll 25 metres

**Code: 02RED** - black/red edge H 10 cm roll 25 metres

### APPLICATION OF PERIMETER EDGES

To order the applied perimeter edge, add to the mat code: /BLK or /RED. Perimeter borders are applied to the required sides: one/two/three/four sides.

### GLUE APPLICATION:

Acrylic glue with antibacterial anti-static additive (with Biomaster). Surface resistance less than  $1 \times 10^6$  Ohm. To order glue application on the underside of the mat, add to the mat code: /C

## PROFESSIONAL CLEANING DETERGENT-SANITIZING ACTION FOR PERMANENT WASHABLE MATS

DETER MED is specifically formulated for the perfect cleaning of washable mats. Thanks to its particular composition and the high degreasing power, it removes any type of dirt and has a sanitizing action. Professional detergent for daily cleaning of all hard and elastic water resistant surfaces.

### HOW TO USE

#### Manual application:

Dilute the product in water at 10%; distribute the solution on the surface of the washable mat; wash with mop and dry with a squeegee/water puller.

#### Floor washing machines application:

Dilute the product in water at 10%; the absence of foam allows it to be used with all types of scrubber-dryers and floor machines.

**APPEARANCE:** Liquid - Perfumed

**COLOR:** Light red

**PH 7 WATER-SOLUBILITY:** Total

**BOTTLE:** 5 LITRES

# MEDICAL ABSORBENT AND ANTI-SLIP DISPOSABLE MAT

Super absorbent protective hygienic mat suitable for various applications and sectors. Made from polyester fibers, the mat features a waterproof, non-slip backing on the underside to ensure excellent adhesion to surfaces while allowing for easy removal. The materials used are non-toxic, and the product is free from chemical binders or adhesives.

## TECHNICAL DATA SHEET:

**DESCRIPTION:** Super absorbent anti-slip mat.

**HOW TO USE:** Simply place it on the surface to be protected (floor).

**MATERIAL:** TNT + polyester waterproof film, with anti-slip base. LATEX FREE.

**DIMENSIONS:** 36 inches (0,90 m) x size required, or in roll → 36 x 1968 inches (0,90 x 50 m).

**ELECTRIC CONDUCTIVITY:** absent

**INTENDED USE:** towel designed to absorb liquids to be placed in the surfaces which need protection.

**ABSORPTION CAPACITY:** 2,5 l/m<sup>2</sup>

**ABSORPTION CAPACITY:** 4,2 l/m<sup>2</sup>

### DENSITY: 270G/M<sup>2</sup> • ABSORBENCY 4,2L/M<sup>2</sup>
